An ice cube will float in water but will sink in ethanol; ice is only a tiny bit less dense Q & A: Floating in Air? Department of Physics University of Illinois . 19 Oct 2015 . China s bizarre floating city is not a giant hologram or window into a parallel It has to do with physics and the way our eyes perceive objects Sink or Swim Soda - Physics Central 4 Nov 2010 . I used to think that the shape of an object determines its ability to float (boat-shaped objects are more likely to float, and spheres tend to sink). Floating and Sinking - Physics Homepage An astronaut on earth notes that in her soft drink an ice cube floats with 9/10 its volume submerged. If she were instead in a lunar module parked on the moon, ?Ben Krasnow: The physics of floating screwdrivers The Physics of Floating. 1. The Physics of Floating. Dominic Vella. 1 Introduction. So, for a floating object on a liquid, the weight of the displaced liquid is the weight of the The Physics of Everyday Stuff - Icebergs - Bsharp.org PhysicsLAB: Floating Ice Cube To sum up: the weight force of a floating object is equal to the upward buoyant force (Newton s Second Law) – $W_{\text{object}} = F_{\text{buoy}}$. We now also know that the buoyant force is equal to the weight of the water that gets displaced - $F_{\text{buoy}} = W_{\text{water displ}}$. The latter statement is also called Archimedes Principle.
